PROFESSIONAL SUMMARY

Electrical and Electronics Engineering student (3rd year, CGPA 8.5/10) who has built and deployed 4 production-ready IoT and full-stack applications integrating ESP32, Flask, React, and cloud databases (Supabase, Firebase). Completed a 3-month Full Stack Web Development Internship at Pantech AI, collaborating with a remote internship cohort of approximately 30 participants using Agile sprints. Seeking software, IoT, or embedded engineering opportunities.

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL, C (Basics), OOPs in Python | **Web:** HTML5, CSS3, Flask, React.js, REST APIs

AI / ML: Scikit-learn, Pandas, NumPy, Supervised Learning | **Databases:** MySQL, SQLite, Supabase (PostgreSQL)

Mobile & Cloud: Flutter, Firebase | **Tools:** Git, GitHub, VS Code, Postman, Canva.

Embedded & IoT: ESP32, Arduino, Sensors, Fingerprint Sensor, Hardware-Software Integration

PROJECTS

Secure Digital Voting System | Python, Flask, ESP32, Fingerprint Sensor, Supabase (SQL) 2024 | Live

[Live: voting-system-ozpz.onrender.com](https://voting-system-ozpz.onrender.com) | [Dashboard: voting-system-24.streamlit.app](https://24.streamlit.app) | [GitHub: github.com/priyagowda11-jpg/Voting-System](https://github.com/priyagowda11-jpg/Voting-System)

- Engineered fingerprint-based biometric authentication via ESP32 linked to Flask backend, writing SQL queries against Supabase PostgreSQL for tamper-proof vote storage
- Built dual interface — hardware polling terminal and web admin dashboard with real-time vote monitoring and duplicate prevention
- Tested the system with 30–50 users during classroom demonstrations, validating biometric authentication and duplicate-vote prevention

AeroGrid AI — Wind Turbine IoT Dashboard | React, Flask, Firebase, ESP32, DHT11 2025 | Live

[Live: aerogrid-ai-henna.vercel.app](https://aerogrid-ai-henna.vercel.app) | [Backend: aerogrid-ai.onrender.com](https://aerogrid-ai.onrender.com) | [GitHub: github.com/priyagowda11-jpg/aerogrid-ai](https://github.com/priyagowda11-jpg/aerogrid-ai)

- Integrated ESP32 + DHT11 sensors to stream live environmental data to Firebase Realtime Database with sub-second refresh rates
- Built React/Vite dashboard integrated with a pre-trained machine learning model in the Flask backend for anomaly detection on turbine sensor data

ASHA Worker App — Health Data Platform | Flutter, Firebase, ESP32, SQL In Progress

- Developing Flutter mobile app for ASHA health workers to record and sync patient vitals with Firebase backend in low-connectivity regions
- Structuring patient vitals records with SQL-based validation and integrating an ESP32 hardware sensor interface to reduce manual data entry in field conditions

Personal Developer Portfolio | HTML, CSS, JavaScript, React.js Live

[GitHub: github.com/priyagowda11-jpg/Priya-G-Portfolio](https://github.com/priyagowda11-jpg/Priya-G-Portfolio)

- Portfolio featuring 6 live technical projects, resume, GitHub links, and a contact form at priya-gowda-portfolio.netlify.app
- Implemented React UI with typing animation, mobile-first layout — optimized for desktop and mobile devices

EXPERIENCE

Full Stack Web Development Intern — Pantech AI March 2024 – June 2024

3-Month Internship | Bengaluru, Karnataka

- Built Instagram clone using Flask, JavaScript, and MySQL with 4 core modules — authentication, image upload, dynamic post feed, and follow system
- Developed 2+ responsive web interfaces using HTML, CSS, and React.js, ensuring compatibility across desktop and mobile devices
- Integrated 5+ Flask REST API endpoints with frontend components and maintained a version-controlled codebase using Git and GitHub
- Collaborated with a remote internship cohort of approximately 30 participants using Agile methodology and sprint-based workflows

EDUCATION

B.E. Electrical & Electronics Engineering — RajaRajeswari College of Engineering, Bengaluru | CGPA 8.5 | 2023–2027

Relevant Coursework: Data Structures & Algorithms, Embedded Systems

PUC — Aditya's PU College, Kanakapura | 84% | 2021–2023

SSLC — St. Anne's Primary and High School | 92.42% | 2021

CERTIFICATIONS

- Full Stack Web Development Internship — Pantech AI (3 Months) | AI & ML in Materials Engineering — NPTEL
- Python & AI Development — DevTown | AI Tools Workshop — BE10x

LEADERSHIP & ACHIEVEMENTS

- Team Lead on multiple academic and hackathon projects; led team to 2nd Prize — Paper Presentation Competition, RajaRajeswari College of Engineering (2025)
- Ranked Top 10 of 150 teams and Top 6 of 50 teams across 5+ Hackathons & Ideathons demonstrating problem-solving under time constraints
- Presented technical project at College Project Expo (2025) | Active GitHub: 8 public repositories | Languages: English, Kannada, Hindi
